

What is claimed is:

- 317
1. A plated synthetic resin member for a vehicle comprising:
a main body made of a synthetic resin; and
a plating coat formed on the surface of the main body and having a metallic gloss;
wherein the main body is molded from a translucent synthetic resin;
wherein the plating coat formed on the surface of the main body is translucent; and
wherein the main body has a built-in lamp that can light up.
 2. The plated synthetic resin member for a vehicle according to Claim 1, wherein the main body is an operating main body that is operated manually.
 3. The plated synthetic resin member for a vehicle according to either Claim 1 or Claim 2, wherein the main body is molded from polycarbonate, acrylic, or ABS.
 4. A plated synthetic resin member for a vehicle, wherein a lock release lever provided on a door of an automobile comprises a lever main body molded from a translucent synthetic resin, and a translucent plating coat formed on the surface of the lever main body that faces a vehicle compartment, wherein the lever main body comprises a built-in lamp that can light up.
 5. The plated synthetic resin member for a vehicle according to Claim 4, wherein the lever main body is molded from polycarbonate, acrylic, or ABS.
